PROFILE

Facing real challenges, getting quick know how in new environments, being part of long-term projects and striving towards goals as a team is what I enjoy the most. Over the years, I built experience in industries like Music and Railway as Scrum Master, Analyst and Developer consultant.

SKILLS

- Gathering, analyzing, modelling, verifying and managing requirements (both functional and non-functional)
- Translating business-level requirements to system-level requirements
- Authoring requirements specifications and functional design documentation using UML
- Systems functional architecture recommendations and solutions, Technical Specifications
- Agile minded

- UML, Software Modelling Software (e.g., Visual Paradigm, Enterprise Architect), SOA, Azure DevOps, Jira, Confluence
- JavaScript, C, Velo (ex-Corvid), SQL, Swift, XML, RailML, C#, C++, Java (Certified)

ASSISTANCE AND COORDINATION

- To users: assistance to key users and product owner during acceptance tests.
- To stakeholders: collaboration and coordination with several stakeholders such as key users, UI experts, developers, testers, outsourced development teams.
- To development team: Functionality development follow-up and assistance by giving expertise regarding the requirements.
- To the product owner: relating to scope management, scheduling, estimation and documentation areas.
- Assistance to deployment activities.
